TOLEDO;

ITS PAST, PRESENT AND FUTURE.

BY IRWIN I. MILLARD.

TUR esteemed fellow-citizen, Jesup W. Scott, Esq., a few months since published a pamphlet, giving statistics to demonstrate that Toledo, at no far distant day, would be the largest, wealthiest and greatest city in the World.

Whether the glorious vision seen by Mr. Scott can ever be indulged in by those more worldly, and "of little faith," or whether indeed Toledo shall, during the lives of the present generation, or at any future time, become the great Metropolis of this continent, time only can determine. But when we remember the rapid growth of the city, when we contemplate the changes witnessed by the above named author, since his advent in Toledo, we are not disposed so much to question the faith that is within him.

In presenting to our readers the early days of the Maumee Valley, we cannot do better than borrow the following extract from the eloquent pen of our former townsman, H. L. Hosmer, Esq.:

"Previous to the battle of General Wayne in 1794, the Maumee Valley was the favorite home of the Indians. Here, for ages, he had lived unmolested, roaming through forests and beside streams that invited and rewarded his pursuits, in possession of a soil which yielded abundantly to his careless tillage and cultivation. Here were the graves of his ancestors for many generations, and the spots consecrated in his affections by recollections and events, which rendered them as dear to him as life itself. Here he had often lighted the council fire, and listened to the indignant denunciations of his brethern against the pale faces. Here forces had been organized for predatory and offensive warfare, and the fearful war whoop and hideous scalp dance had often proclaimed how successful had been their bloody enterprise. This beautiful valley was to the Indian enchanted ground. He never left it for the briefest period without regret, or returned to it without delight. The gurgling of the river as it broke into rapids over the rifted rocks, the sighing of the wind through the mighty forests, the drumming of the partridge at mid-day, and the prolonged howl of the wolf at midnight, were sweeter music to this ears than any he had ever

listened to elsewhere. Here the Indian maidens were more beautiful, and the gallants of the sterner sex more manly and daring. Mighty nations, not unlike in number and power the mighty nations of old, rose and fell here, amid the scenes which had witnessed their combats, and the remnants which had struggled for their supremacy.

At the treaty at Greenville in 1795, General Wayne made a reservation for military and commercial purposes, of twelve miles square from the Indian Territory, the centre of which was Big Island, at the foot of the rapids of the Maumee River. This reservation extended down the River, far enough to include the mouth of Swan Creek, and a portion of the ground now covered by Toledo. In 1816-17, Congress, by a Special Act, ordered this reserve to be surveyed and sold. About four hundred acres of land at the mouth of Swan Creek was purchased at the sale made in pursuance of this order, by some Cincinnati parties and others, and a portion platted "into town lots, and the place called Port Lawrence." For this tract the Company agreed to pay the government \$76.00 per acre, one-fourth cash, and balance in one, two and three years. The Company were unable to meet the payments when due, and Congress passed what is known as the Relief Law, by which the Company was allowed to retain, for the quarter payment made,

a portion of the land, the balance reverting to the Government. By this arrangement Port Lawrence was entirely abandoned, and the lots surrendered to the United States. The land at this time was held to be in the State of Michigan, and the Michigan University owning some floating sections, given them by the General Government for University purposes, located upon the Port Lawrence Tract, and their title to the same was subsequently confirmed by Act of Congress. At a later period William Oliver, Martin Baum and Micajay T. Williams purchased this land of the Michigan University, and thus again became the owners of Port Lawrence. These parties did little or nothing to improve their purchase, and consequently there were no indications of future growth, until 1832, when Major Benj. F. Stickney, who for many years had been an Indian Agent, who had purchased a large tract of land adjoining, entered into a contract with Samuel Allen and Otis Hathaway of Lockport, New York, and platted a portion of his land, calling it Vistula. In 1833, EDWARD BISSELL of Lockport, New York, came to Toledo, and entered into a contract with Major Stickney, similar to the contract with Allen, (Allen having failed to perform,) and the contract was filled to the letter. Whatever Toledo may become in the future, she will always owe her first start in life to Mr. Bissell, a gentleman of fine education and refinement, of great foresight

and sagacity, an energetic worker, who knew no such word as fail. In reference to the above contract, Major Stickney in his report says:—
“ Bissell set about the work of improvements in earnest. He built wharves and houses, advanced money for making roads, and in many respects, did more than his contract required. Vistula advanced rapidly, and soon acquired considerable reputation.”

At a later period Port Lawrence and Vistula were united under the name of Toledo. The place increased in population steadily, and in 1837-38, numbered about 800 inhabitants. The opening of the Wabash and Erie Canal in 1841, and of the Miami and Erie Canal in 1845, gave a considerable impetus to the settlement, and at the completion of the Michigan Southern Railroad, about the year 1851, it had nearly 4,000 inhabitants. In 1863 the population of Toledo was in the neighborhood of 15,000, and in 1868 the census showed a population of 32,000, and at this date it cannot be less than 35,000.

The Commerce of Toledo is large and rapidly increasing. Nearly 1,500 miles of Railroads and over 600 miles of Canal centre here, and render tributary to our city, the wonderfully rich and fertile country, extending from Cincinnati on the South, on the West to the Mississippi River, and, by the completion of the Great Pacific Railroads, places her now in direct communica-

tion with the Great World beyond the Plains, extending to China in the East.

In addition to Railroads and Canals, we have the great chain of Lakes and our broad River, upon which ride a large fleet of steam and sail vessels, bringing to and carrying from our docks freights of almost every description. Five lines of steamers ply between Toledo and different parts of the country. But with all her Lake, Rail and Canal communication she is unable to furnish sufficient transportation to Eastern cities of the wealth that is daily poured into her lap. Two new Railroads are projected from her borders to eastern connections, and the next year will doubtless see one (if not both) of these roads in active operation.

From the last Trade and Commerce Report, (by C. T. Wales, Esq., of the *Toledo Blade*,) we glean the following items:

“There was received at this Port, during the year 1868:

By Lake, Pine Lumber 110,513,500 feet.

And by Detroit and Toledo Rail-

road, during the same period..... 8,420,000 “

Total.....118,963,500 “

Amount received during the year

1860..... 37,368,536 feet.

Amount Salt received by Lake..... 218,292 barrels

Shingles received by Lake..... 52,134,000 feet.

Lath received by Lake..... 28,147,000 “

During the same period there were shipped :

Wheat.....3,132,927 bushels.

Corn 5,612,722 “

Oats 2,193,789 “

Black Walnut Lumber shipped

to Eastern points.....43,830,056 feet.

Staves shipped to Eastern points 10,684,018 “

and other articles in proportion.

The historical “Black Swamp” of sticky memory, where formerly one could travel for days and stay at the same house each night, is fast becoming one of the most fertile farming sections in Ohio; and here, at our own door, we have an element of strength that will add largely to the prosperity and future greatness of the city. Within a radius of from twenty to sixty miles of Toledo, are thousands of acres of good land that can be purchased at low rates and on long time; before the last payment becomes due, the timber it affords will have paid for the land, the farm will be cleared, and the owner will be living in the midst of civilization—good schools, churches, mills, factories, and a splendid market for the products of his labor. To this, as yet uncultivated territory, Toledo must look for much of her future wealth. These lands must be cleared and cultivated, and she must have the timber in one shape and another to send to the Eastern States and the Old World; she must have the golden grain that is eventually to wave from every acre now covered by timber, and the farmer must have the fabrics and imple-

ments she can offer in exchange. What need is there for men to go to the "Far West" to purchase wild land, spending almost as much money to reach their destination as would buy a good farm right at home? Why should they slave for years in a wild country, isolated from all the comforts of civilization and good society; spending the best years of their lives in exile, compelled to forego every pleasure and luxury, only to find, at the end of a life of such toil and privation, what they could have enjoyed years before by remaining in their own grand Commonwealth of Ohio?

We need the Erie Broad Gauge. We need a Railroad direct to the Coal Mines of Ohio. We need a Railroad to the Lumber, Salt and Iron regions of Michigan. We need the enlargement of the Miami and Erie Canal, that freights may be reduced. We need the channel of our River improved; but none of these are to be so much desired as the settlement of the rich wild lands almost at our door, that should be cleared and made to "bloom as the rose."

Our city at one time depended almost solely on her Commerce for growth and rank. In this line she has multiplied tenfold faster even than in population, but at the present time she is making rapid strides toward becoming a manufacturing city. Iron ore from the regions of Lake Superior, is now landed in any desired quantity upon our docks, meeting there the coal from Ohio mines, and vast quantities of desirable timber from the grand forests of

the Northwest, making the raw material cheaper here than it can be found at any other point. Our transportation facilities reach out to every part of the inhabitable globe, giving a ready market for all manufactured articles. Steam on Lake, River and Rail, has so annihilated distance as to bring all parts of the earth together and make the wealth of all lands common property to every nation. For parties who desire to embark in manufacturing or commercial pursuits, Toledo offers not only her Lake, Rail and Canal facilities, but she has *one of the very best Harbors* in the world, with miles of the best Docks and shipping conveniences of every kind—channels of trade already opened but not a tenth part supplied.

Many miles of Nicholson and stone pavements are laid in her streets. Buildings that would do credit to any city, greet the eye upon every thoroughfare. Schools and School Buildings, second to those of no city in the West are found here, and in no other place can so good an education be obtained at so little cost. Churches of every denomination are numerous and well attended. In the hot season our nearness to the Islands of Lake Erie, with which the delightful Steamer the "Lake Breeze" has daily communication, affords summer recreation for all at a low price.

Prominent among the institutions of Toledo, deserving of mention, stands "The Toledo Library

Association," organized in October, 1864, and incorporated under the State law the following month. It has a library of over five thousand volumes of well selected books, a Reading Room in which the leading newspapers and periodicals of the world can be found, and the extent of its influence for good can hardly be estimated. That it is an efficient educator is shown by the fact that over fifty books are daily drawn and read by its members, while the Reading Room, a most excellent feature, furnishes information and news that can be received as extensively in no other way.

The Rooms of the Association are located in King's Block, on the corner of Summit and Madison Streets; are handsomely furnished, and very conveniently arranged, and all strangers visiting the city are cordially welcomed to their use and advantages during their stay, without charge or conditions.

At its last election for officers the question was submitted to its members, whether the women, who furnished a part of its income, should have a part in the administration of its affairs, and after a thorough canvas, the friends of the movement were rewarded by the election of their entire ticket by a vote of two hundred out of three hundred and twenty-seven votes polled. Thus, education is shown to be the lever of liberal ideas and prejudice, the coadjutor of ignorance, in their antagonism to institutions of the kind.

The Association receives its support entirely from membership subscriptions—each member paying three dollars yearly. The citizens are justly proud of it, and take pleasure in exhibiting it to strangers as a credit to the city. It is so; that an institution purely literary can thus be sustained, and no community can sustain such an one without manifest benefit to its people.

The Officers of the Association are as follows: President, A.W. Gleason, Vice-President, Frank J. King; Treasurer, Chas. Spencer; Secretary, Chas. E. Perigo; Board of Directors, Wm. Baker, John H. Doyle, Isaac W. Holman, Miss Cannie Mott, Mrs. M. W. Bond, Mrs. M. J. Barker, Jno. W. Fuller, E. V. McMaken and John J. Barker; Librarian, Miss Cora V. Nelson.

The future of Toledo seems to us bright and promising. Her business connections are being rapidly extended. She not only furnishes a large territory in the West with merchandise and manufactured articles, but supplies large quantities of Lumber, Chairs, Wood and Bent Work of various kinds, to the Eastern market, to California and Europe. Her great need to-day is CAPITAL. With an abundance of this there is scarcely a conceivable limit to her future growth and prosperity. In no other city can capital, if judiciously invested, yield such large returns, and nowhere else can money be placed with such certainty of its being multiplied within a few years. The im-

portance of her location and her connections with the surrounding country, are every day becoming better understood.

The inducement she offers to Merchants and Manufacturers are constantly drawing to her midst men of energy and commercial ability. These in turn draw others, and in this way the want of capital is being gradually overcome. The hum of business and the song of labor is constantly heard in our streets and along our beautiful river, and, we think, are fully justified in saying that ere another decade the population of Toledo will be at least one hundred thousand, and her wealth second to no city in the West.

“Thus the past is blended with the future, and thus the present swells into the future, That glorious future, rich in its promise of fruition, to the long posterity that even now is beginning to enjoy it.”

**JOHN B. MARSTON,
ENGINEER AND SURVEYOR**

ESTABLISHED IN 1853.

OLDEST OFFICE IN THE CITY.

Office, Campbell Block, Cor. St. Clair and Jeff. Sts., Toledo.

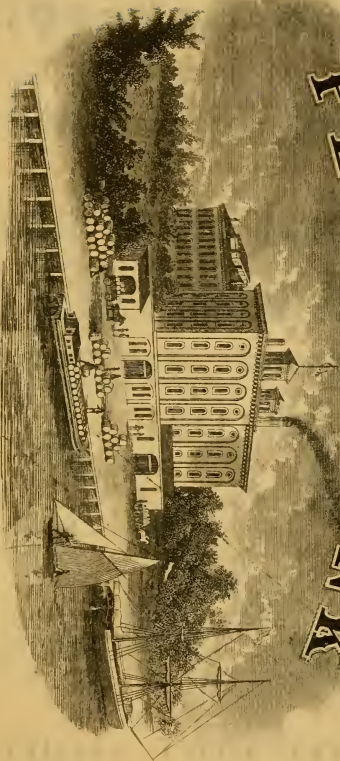

Publisher of City Maps; various styles and sizes on hand.

ENDORSEMENT.

Of some seventy additions to the City, made since I came to Toledo, in December, 1853, I have surveyed and platted forty of them, *more than half of the whole*, and of forty-seven additions made in the last six years, I have done thirty-four, *about three-fourths of the whole*, as can be seen by actual count upon the City Maps; an endorsement by the citizens of this city, which speaks for itself:

J. B. MARSTON,
CIVIL ENGINEER AND COUNTY SURVEYOR,
Campbell Block, Toledo, O.

METHODIST.—St. Paul's—corner Superior and Madison.

Ames Chapel—Lagrange Street, between Superior and Huron.

Centenary Church—Broadway, corner Western Avenue.

German Emanuel—Ontario Street, between Lagrange and Locust.

East Toledo Church—In Brown's Hall.

African Church—Ontario Street, between Monroe and Washington.

UNITARIAN.—First Church—Corner Superior and Adams.

Rev. Stephen H. Camp, Pastor.

PRESBYTERIAN, (O. S.)—The First Presbyterian Church, (O. S.) of this city, was organized in 1859, with six members, by Rev. E. B. Raffensperger, who continued to be its pastor till October 1, 1868. During the ministrations of Rev. Raffensperger this church was not only prosperous, but sent out a flourishing colony to form a second church, and has, besides its home Sabbath School, a thriving Mission School. The congregation of this church is now erecting a new building at the corner of Huron and Orange

streets, which, it is hoped, will be ready for occupancy before the close of the present year, and which will be, when completed, one of the most beautiful and commodious in the city. Rev. H. M. McCracken is the present pastor of this church. Ruling Elders—S. Whittlesey, Geo. Bennett, Samuel D. Chamberlain and Jonathan Wood.

Second Church (O. S.)—Services in Union Church, East Toledo.

Rev. T. D. Edgar, Pastor.

Westminister Church, (N. S.)—Locust, corner Superior Street.

Rev. H. M. Bacon, Psstor.

CONGREGATIONAL.—St. Clair Street, between Jefferson and Madison.

Rev. W. W. Williams, Pastor.

GERMAN LUTHERAN.—Evangelical—Erie Street, between Oak and Adams.

Rev. C. Marksheffel, Pastor.

Lutheran—Huron Street, between Elm and Chestnut.

Rev. Hermann Bruckner, Pastor.

St. John's—Harrison Street, bet, Erie and Vinton.

Rev. John Drindorfer, Pastor.

ROMAN CATHOLIC.—St. Patrick's—Corner Lafayette and Thirteenth Streets.

Rev. E. Hannin, Pastor.

St. Mary's (German)—Cherry Street, corner Michigan.

Rev. Christian Viere, Pastor.

St. Peter's (German)—St. Clair, corner Canal.

Rev. Peter Dannehooffer.

Immaculate Conception—Corner Summit and Western Avenue.

St. Francis de Sales—Corner Cherry and Superior Sts.

Rev. F. M. Boff, Pastor.

St. Joseph's Chapel (French)—Erie Street, bet. Cherry and Walnut.

Rev. Charles Wardy, Pastor.

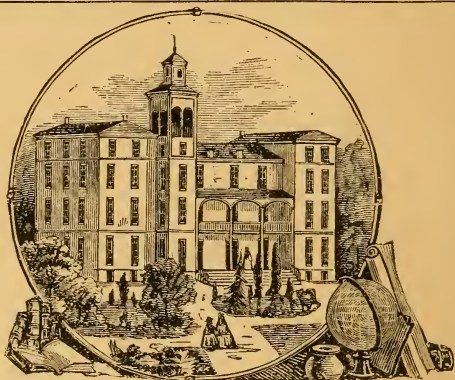

SOCIETY AND PROGRESSIVE LYCEUM OF SPIRITUALISTS AND LIBERALISTS OF TOLEDO.—Rooms third story, over North-Western Savings Depository Summit Street. Oliver, Stevens, President; Henry Breed and ——— Jones, Secretaries; J. Engelhardt, Treasurer. Lyceum Officers, C. B Eells, Conductor; Miss Ella Knight, Guardian. Meets every Sunday morning at 10 o'clock.

STREET RAILROADS.

Adams Street.—Route from Summitt to Tremainsville on Adams Street.

Toledo Street R. R. Co.—Route, Summit and Broadway.

Young Ladies *Mount Auburn* Institute,
Cincinnati, O.

Stands unrivaled as a school for young ladies. With a faculty of fifteen instructors of long experience, three of them Professors, (graduates of the first colleges in the land,) with an unexcelled LOCATION an ample APPARATUS, LIBRARY and READING ROOM, it affords facilities for a course of instruction as thorough as can be obtained in the country.

For Catalogues or information address,

Rev. A. J. ROWLAND, *President, or*
I. H. WHITE, 143 Race St., Cincinnati.

AND CAMPBELL, BLOCK, TOLEDO, O.

ELASTIC JOINT IRON ROOF.

EVERY ONE CAN HAVE A

Fire & Water-Proof Roof

Easily applied by any one with ordinary mechanical skill, at a low price. No solder required, no nails through the roofing itself, yet resists Fire, Water and wind, and fully provides for expansion and contraction of the metal, as proved by fourteen years' practical use.

Boxed to Ship to all Parts of the Country.

Orders promptly filled.

CALDWELL & CO.

CINCINNATI, OHIO.

Send for Circular.

Portable Engine and Saw Mill Works.

ZANESVILLE, March 26, 1869.

We have used considerable quantities of your Elastic Joint Iron Roofing for several years past, and are highly pleased with it. It gives us full satisfaction.

Very Respectfully, &c.,

H. & F. BLANDY.

Marietta Bucket Factory.

HARMAR, O., April 17, 1869.

I cheerfully accord all the praise to your Elastic Joint Iron Roofing it merits. I think it the best metallic roof in use. Our Public School House, the Congregational Church, the Odd Fellows' Hall, and numerous Private Dwellings having it on for several years, I have not heard of one that is dissatisfied with it, or have any fear it will fail to be all that is recommended.

Very truly,

A. S. CURTIS.

J. FULLINGTON, President.....DANIEL McMILLAN.
J. W. ROSS.....WM. B. McCLUNG.

RAILROAD ARRANGEMENTS

Have been made with all the roads running to Toledo, by which passengers will be carried for one fare the round trip, by purchasing "round trip tickets" before entering the cars—conductors are not provided with these tickets. When parties arrive on the Fair Grounds, they will at once proceed to the Secretary's office, to have the trip ticket STAMPED, otherwise it will be valueless on many roads.

FIRST DEPARTMENT.—OPEN TO ALL THE STATES.

HORSES.

NELSON J. TURNEY, of Circleville, Attending Member of the Board.

2d best sorgho evaporator.....	10
Best improvement in sorgho machinery not specified above	

Diploma

The Board desires to afford such facilities for the exhibition of sorgho machinery as will make the department a feature of interest to all parties concerned.

Persons desiring to exhibit will be assigned a convenient position for the purpose of erecting such structures for the display of their apparatus as they may choose.

All machinery in this class must be exhibited in operation. Evaporators must have produced upon the grounds, under the supervision of the committee, not less than one-half barrel of syrup.

Entry Book 33.—Plows and
Plowing Match.

The plows to be tested by an actual trial with a dynamometer, the Board finding ground in which to make the trial under the following

RULES:

I. The plows to be held by the competitors, or persons appointed by them.

II. Each plow shall open and plow four rounds, back furrowing; the last furrow to be not less than seven inches deep and thirteen wide.

III. In testing the draft, the same plowman shall hold the plow who did the trial plowing—the second furrow to be the test, which shall be of the size above indicated.

The following points will be con-

sidered by the committee in determining the merit of the plows:

- I. Gross draught.
- II. Weight of plow.
- III. Loss of power in overcoming friction.
- IV. Net power required to cut and turn furrow slice.
- V. Width of furrow slice.
- VI. Depth of furrow slice.
- VII. Comparative draught.
- VIII. Simplicity of structure, materials, workmanship, durability and price.

--	---

*The culture of the plant and process of manufacture, and quantity of syrup produced, to be stated in writing, sworn to by the manufacturer, and filed with the Secretary.

ESSAYS.

A Premium of \$100 will be paid for the best accepted report of the Agriculture of either, or each, of the following counties: ADAMS, KNOX, MAHONING, MEigs and MIAMI. The report to embrace, in plain and popular form, a general description of the Soil and its Cultivation; the Crops produced; the extent to which sub-soiling, or plowing with the Michigan double plow, and underdraining have been conducted and the results; how barn-yard manure and other fertilizers have been applied and the results; a description of Farm Stock—Cattle, Horses, Sheep and Hogs; the breeds that have been resorted to for their improvement and the results, with an estimate of the proportion of each class which yet remains unimproved, and the effect of the improvement upon the value of the stock, etc.; the system adopted in the management of grass lands—the production of hay, grazing etc. Also.

A Premium of \$25 will be paid for the best accepted Report of ACTUAL EXPERIMENTS made, in any part of the State, in underdraining; describing the character of the soil and the mode of cultivation; depth of drains; what distance apart; the description of tile or other material used; the expense per rod or per acre, and the effect produced upon the condition of the soil and character and amount of products.

The Reports to be sent to the Secretary's office in Columbus, before the FIRST OF JANUARY, 1870, at which time the awards will be made by a committee of the Board.

PREMIUM ON WHEAT, \$1,000.

The following premiums will be paid for the greatest number of bushels of wheat grown during three successive years upon the same tract of not less than five acres of land:

Best 5 acres, not less than 40 bushels per acre, harvested in 1870.....	\$200
Best 5 acres, not less than 40 bushels per acre, harvested in 1871.....	200
Best 5 acres, not less than 40 bushels per acre, harvested in 1872.....	200
Best 5 acres having yielded the greatest average during the three years, 1870, 1871, 1872	400
	\$1,000

These premiums to be awarded upon the following statements, (from I. to VI. inclusive) sworn to and subscribed before a proper authority, and filed in the office of the Secretary of the Ohio State Board of Agriculture, on or before the first Wednesday of January, 1870; and also the statements from and including III. to VII. inclusive, to be filed with said Secretary annually on or before the third of January, 1871 and 1872, and statement No. VII. by January 3, 1873;

I. An accurate description of the soil and subsoil, a general description of the "lay" of the land, a description of the surroundings, forests, hills, &c.

[At least 5 pounds of the soil, taken so as to include from the surface to the depth of ten inches, together with 5 pounds of the subsoil, taken so as to include all from ten inches from the surface to twenty inches from the surface. This soil should be taken up before the fall rains have set in, and each (the soil and subsoil) put in a separate package and forwarded to the office of the Secretary of the State Board of Agriculture by January 1, 1870.]

II. A statement of what crops were grown on the tract during the years 1866, 1867, 1868 and 1869, and whether the crops were good, bad, or indifferent; how often and when manured during these years, the quantity and kind of manure applied to each acre, as accurately stated as possible.

III. A statement of the kind, amount and condition of manure;

when and how applied in contemplation of the premium crop.

IV. A detailed account or statement of the depth of plowing, kind of plow used, number of times the tract was plowed, the precise time of the month that it was plowed; also a statement of any other method of cultivating the soil, if any, previous to sowing with wheat.

V. Time and manner of sowing, as well as the depth at which the seed was sown.

VI. The weight, quality and variety of seed wheat, and the amount of seed sown per acre.

VII. A detailed statement of the entire cost [in money, labor and material] in producing the crop, as well as a sworn statement of the amount of the crop—both grain and straw.

Entry Book 51—Sweepstakes on Cheese.

For the best and largest display of cheese.....SIL. MED.
Competitors in Entry Books 50 and 51, must state, in writing, the time it was made; the number of cows kept; whether the cheese was made from one, two or more milkings; whether any addition was made of cream; the method of preserving and preparing rennet; the mode and amount of pressure, and the treatment of the cheese afterward; and shall answer the following questions:

1st. What do you consider the best breed of cows for dairy purposes.

2d. What variety of grasses produce the best pasturage for making cheese?

3d. Does long continued grazing for dairy purposes exhaust or improve your land for dairying?

4th At what price per acre can land be profitably used for dairy purposes in Ohio?

5th. What is a proper temperature of a room for curing cheese, and what effect does a higher or lower temperature produce upon the flavor and other qualities of the cheese?

6th. State in in DETAIL your process of making and curing cheese, including the preserving and preparing rennet for use, etc.

No premium to be awarded unless all the rules are fully complied with, and all the questions properly answered.

PUBLIC BUILDINGS.

THE limits of our HAND-BOOK will admit of but a small space to the mention of the many public buildings and private residences with which our city is graced, but we cannot avoid noticing the following, of which engravings will be found in our pages:

FIRST NATIONAL BANK BUILDING.—This elegant stone building occupies a front of 45 feet on Summit Street, and runs back 80 feet to the alley in the rear. The height of the building is three stories, with a basement story, the latter being but 28 inches below the sidewalk. The basement story is 9 feet high, and the 1st, 2d and 3d stories are respectively 14, 13 and 12 feet in the clear.

The first is designed to be used for banking purposes, and is divided into two rooms, with hall between. The room on the west side is occupied by the First National. Each story has two fire-proof vaults, for the use of occupants of each suite of rooms.

The plan of the second story is similar to that of the first. M. O. Waggoner, Esq., General

CLARK WAGGONER & SON,

Toledo Morning Commercial

PRINTERS, BINDERS AND BLANK BOOK MANUFACTURERS,
175 & 177 SUMMIT ST., TOLEDO, O.

READ WHAT IS SAID OF

THE TOLEDO COMMERCIAL.

It is now one of the largest dailies in the State, and one of the best.—*Sandusky Register, Monday, May 23.*

The Toledo Daily Commercial comes to us now in an enlarged form, and we consider it one of the best newspapers in Ohio.—*Norwalk Reflector.*

We consider the Commercial one of the most ably conducted papers in the West, therefore deserving of its prosperity.—*Perrysburg Journal.*

The Toledo Daily Commercial has been enlarged to a nine column sheet. It is now as large as the average Ohio dailies, and head and shoulders above many of them in point of real worth as a newspaper. *Wauseon Republican.*

The Commercial is decidedly the best daily published in Toledo.—*Putnam County Sentinel.*

Who can do without a good morning daily, such as the Commercial.—*Waterloo City (Ind.) Air Line.*

On last Saturday we received the Toledo Daily Commercial in an enlarged form. The Commercial keeps fully up with the progress of the times, and embodies all that goes to make up a first class reliable paper. We wish it abundant success.—*Ligonier (Ind.) Republican.*

The energy and ability of this paper is proverbial.—*Napoleon Signal.*

It is now the size of our largest dailies, and it is a very valuable paper to all classes.—*Elmore Courier.*

This is certainly the best paper in Northern Ohio. One of the most reliable and valuable papers in Ohio.—*Manchester (Mich.) Enterprise.*

The Toledo Daily Commercial comes to us enlarged and improved. We have for a long time highly prized the Commercial, and considered it a most excellent newspaper. Now it will be no easy task to find a journal conducted with more ability, and one better calculated to please everybody than the Commercial.—*Painesville Advertiser.*

Superintendent for the Guardian Mutual Life Insurance Company of N. Y., has taken and now occupies one-half of the second story, and Messrs. Bisseil, Gleason & Co., occupy the other half.

The third story is designed for offices, and sleeping apartments.

The basement on the west side is occupied by the Toledo Fire and Marine Insurance Company, and the other half of the basement is occupied by the German Laborer's Loan and Savings Association.

The front is divided into five openings, the center one being treated with more detail to give prominence to the main doorway. Those of the basement and first story are made with square headed openings, while those of the second and third stories are circular-headed. The corners of the building have broad rusticated quoins from the grade line to the bottom of the cornice, which give to the front the appearance of great strength and solidity. The second and third floor windows are designed with molded arches, and have ornamental pilaster caps

Each story is distinctly defined by a strong course, the one over the first story being larger and cut with greater detail and projection. A portion of this course projects over the main doorway about five feet, with cut stone balustrade, surmounted with pedestals and vases at the

OFFICE, NO. 5 LENK'S BLOCK, TOLEDO, OHIO.

corners. This balcony is a bold feature, and is introduced in the front with admirable effect.

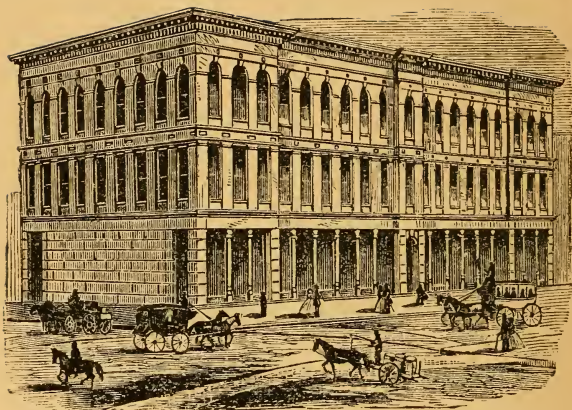

The cornice surmounting the building is of the vignola pattern, of excellent proportions, and covers the whole in an appropriate manner.

Mr. C. C. Miller, architect, is entitled to very great credit for the good judgment exhibited in the arrangement of the various departments of the building for business purposes, and for the skill displayed in the ornamentation of its front.

The first floor above the First National Bank with the room in the rear part of the third story is occupied by the law firm of Bissell & Gorrill, and the Abstract and Real Estate firm of Bissell, Gleason & Co.

The Abstract Books, which now embrace a history of the title to each lot in the city of Toledo, and each tract of land in the county, will be placed with all valuable papers of clients, in the fire and burglar-proof vault on this floor, which is a duplicate in every respect with the bank vaults below.

The main office is supplied with stationary book cases on one side, and cases for the filing of papers with the desks of members of the office on the other, and at the ends. The senior member of the firm, Mr. Bissell, occupies the rear room on the floor above as a private office, from which a speaking tube connects with the room below. These firms now have a working force of nine

men, and being connected with the United States Law Association, through which they have correspondents in every county in the United States, expect rapidly to increase their force. The room over the stairway is connected with the main office and will be occupied by Mr. Gorrill. The main office is seventeen feet wide by eighty feet deep, and taken with the vault and consultation rooms connected with it, makes one of the largest and most convenient law offices in the United States.

Opposite the offices of Bissell, Gleason & Co. are the fine apartments and magnificent furniture of The Guardian Mutual Life Insurance Company. Here may be found the genial Superintendent, M. O. Waggoner, Esq., and the fascinating and gentlemanly assistant, Prof. C. P. Griffin. Some men are peculiarly fitted for one thing, and some for another, but it is seldom that men are found who are so well calculated to build up the business of an Insurance Company as the gentlemen above named, who have charge of the Guardian.

The front suite of rooms on the third floor over the offices of the Guardian Insurance Company, is occupied by R. W. Smith, the patentee of the well-known and celebrated "Smith's Patent Truss Bridge." Mr. Smith is an enterprising, wide-awake business man, and a genial whole-souled gentleman—possessing mechanical abilities of a high order. After great labor and numerous experiments, he has succeeded in so combining me-

DAYTON, O.

chanical principles in the construction of this Bridge, that every timber in it not only sustains an equal strain, but is so arranged that its utmost resisting capacity will be exhausted before any part of the structure can give way. Every bridge built by this Company, or built upon this plan, so far as we can learn, has given the most perfect satisfaction.

The works of the Bridge Company, at Toledo, are situated near the T.W. & W. Round House, and are very extensive, being supplied with new machinery believed to be entirely superior to any thing of the kind in the country, which enables them to do work in the most thorough and substantial manner, and with the greatest possible expedition.

DRUMMOND BLOCK.—This block was erected during the past year, and is located on the corner of Madison and St. Clair streets, immediately opposite the Post Office. It is built of a superior quality of Amherst stone, and in perfect architectural taste and proportion, and the general style of finish, both interior as well as exterior, is such as to make it the most complete, if not the most beautiful block in the city.

The stores are occupied by Messinger & Co., Grocers; Steele & Mills, dealers in Music and Musical Instruments; Love & Hersey, Jewelers and Fancy Goods; The Grover & Baker Sewing Machine Co; E. Quigley, Dealer in Mirrors, Pictures, etc., etc.

The second story by Messrs. Hill & Pratt, Messrs. M. R. & R. Waite, J. R. Osborn, Kent Newton & Pugsley, B. W. Rouse, H. S. & E. S. Platt, Scribner & Hurd, E. D. Potter, Clarence Morris. The third story by W. H. Mahen, studio and art gallery; the Maunee Shooting Associa-

SHARPS, DAVIS & BONSALE,

WITHERBY, RUGG & RICHARDSON,

AND OTHER FIRST CLASS MANUFACTURERS.

tion; Messrs. Lyons & Pratt, Insurance Agents; John Lokie, Insurance Agent, and others.

CAMPBELL BLOCK.—This block, of which we show an engraving, is also one of our first class public buildings, and is among the finest in the city. It is eligibly located, on the northeast corner of Jefferson and St. Clair streets, having a front of 60 feet on Jefferson and 120 feet on St. Clair. This fine building cost over \$40,000; the plate glass alone costing about \$3,000—and was built by James H. Campbell of this city, and Edgar L. Herrmance of Castleton, New York, by Luther Whitney, after plans drawn by C. C. Miller.

It is conveniently and tastefully arranged, having three stores fronting on Jefferson street, and four stores fronting on St. Clair Street.

The Laborers' Savings and Loan Association, of which Jas. H. Campbell is President, and Chas. E. Bliven is Secretary; The Manhattan Fire Insurance Company of New York; the Branch Office of the Cincinnati Mutual Life Insurance Company of Cincinnati, which is for all practical purposes a "Home Institution," under the management of J. W. Woods, Esq., the *live* Superintendent of Agencies and Life Insurance man, assisted by a Local Board of Directors regularly organized. Northern Ohio, and the entire State of Michigan have been made tributary to this Branch office, and the reserve fund that accumulates from premiums collected in this large territory will be held at this Branch office for loan and investment. Life Insurance has hitherto drawn money away from the community, and the drain thus made upon the floating capital has been felt as a serious evil. The only remedy for this evil is home life insurance, and this company

has furnished that very remedy in the establishment of this Branch office in Toledo. Campbell & Bliven, Attorneys and Real Estate Dealers, and W. H. Currier, wholesale dealer in Musical Instruments, occupy the main floor.

The second floor is occupied by the Calvert Lithograph Company and as offices for Lawyers, Physicians, Real Estate Dealers, Civil Engineers, Magistrates and Artists. Each office has two rooms and two entrances, and there is an entrance to this floor from both Jefferson and St. Clair streets.

The third is planned similarly to the second floor.

The basement is conveniently fitted as a Restaurant, with all the modern improvements. Gas and water is abundantly supplied in the building, the water being obtained from a fine artesian well, located in an area, and a force pump, with hose, would, in case of fire, throw an almost unlimited supply of water into any part of the building.

HARTFORD BLOCK.—This block is finely located at the corner of Summit and Madison streets, with a desirable frontage on both streets. Its occupancy is larger than that of any other building in the city, and is in every way a first-class block of magnificent proportions, but of much less modesty in appearance, as a representative of modern architecture, than those previously referred to, but as its location is at the heart of our city, it will always be occupied by a desirable tenancy.
